CRITICAL ISSUES (critical, high severity): 0

Critical and harmful access for owners, user block ability, Bugs and vulnerabilities that enable theft of funds, lock access to funds without possibility to restore it, or lead to any other loss of funds to be transferred to any party.

HIGH ISSUES (high, médium severity): 0

The owner's privileges, access and permission that cause changes in the contract results and parameters, enable/disable main modules and features exclude/include specific users.

ERROR, BUGS AND WARNINGS (medium, low severity): 0

Bugs can negatively affect the usability of a program, errors that can trigger a contract failure, Lack of necessary security precautions, other warnings for owners and users, warning codes that are valid code but the compiler thinks are suspicious.

OPTIMIZATION (low severity): 0

Methods to decrease the cost of transactions in Smart-Contract.

Conclusion:

In the **Rhino Token** Smart-Contract were found no vulnerabilities, no backdoors and no scam scripts.

The code was tested with compatible compilers and simulate manually reviewed for all commonly known and specific vulnerabilities

So **Rhino Token** Smart-Contract is safe for use in the Binance Smart Chain

Contract: [0xe7886f869d7ae46f5ff88034125a445ea01576e6](https://www.binance.com/en/contract/0xe7886f869d7ae46f5ff88034125a445ea01576e6)

Independent Description of the Smart-Contract functionality

The **Rhino Token Smart-Contract** provides the opportunity to hold tokens in your wallet and earn passive income without staking

- ❖ It is a reflective token that will return a profit to every user that holds the tokens in this wallet
- ❖ The profit will be made by transactions, in each buy or sell, the holders will earn \$Rhino that will be automatically transferred to the holder wallet
- ❖ All libraries which were used for calculation and the token in the contract are standard and safe
- ❖ There is an anti whale system this means that every wallet is limited to 2.5% of the total supply
- ❖ Anti Dump: Holders can sell a maximum 0.5% of the total supply

Token Info (all information based on Audit date)

- Total supply: 1,000,000,000,000,000 RHINO
- Holders: 1 address
Owner 100%
0x8B568d16FCC8dA4d6B4fdf5d727feF44eff73aF8
- Total transactions: 1
- Name: RhinoCoin
- Symbol: Rhino
- Decimals: 9
- Contract: 0xe7886f869d7ae46f5ff88034125a445ea01576e6

Analysis and check of the functions

Functions: 64 functions were checked in this smart contract.

Functions: 61 functions were found on my whitelist and follow safety pattern.

Functions: 3 functions were not found in my whitelist, but they were checked and are safe.

Transfer function: The transfer function is secure and uses all safety pattern.

Result: Passed, no hidden functions in smart contract.

This Audit is only to the Smart-Contract code at the specified address.

Rhino Token:

<https://bscscan.com/address/>

[0xe7886f869d7ae46f5ff88034125a445ea01576e6](https://bscscan.com/address/0xe7886f869d7ae46f5ff88034125a445ea01576e6)

Matt Raleigh is an independent auditor who works based on client request. And I check on the contract for any vulnerabilities, backdoors, and/or scam scripts:

Therefore:

I am not financial advisor nor do I partner with the contract owners

I do not have influence over client operations, which can lead to website changes, etc.

The user always has the option to interact directly with the smart contract.

Any concerns about the project themselves need to be raised directly to the project owners and not through Matt Raleigh

I am not responsible for your funds or guarantee your profits

I highly recommend that investors do their own research and gain experience before investing
